It's a all around great game both online and in the singleplayer. The gold edition dlc is \u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665 though and I wouldn't recommend it. There is a surprising amount of quality in the popular maps section. I love this game and would recommend it to anyone looking for a old school fps.
