What's New In Sleep Timer Clock?

Sleep Timer Clock is a time timer for computers. It is designed to let you set a time limit for computer shutdown, restart, standby, hibernation, lock your desktop or any other task. Features: Set times from 1 minute to 12 hours. Laptop, PC or Mac compatible. In sync with computers clock. Sleep Timer Clock - User Ratings / Comments Rating Breakdown 5 /5 stars from 2 comments (2 reviews) so far. 5 /5 stars 3 /5 stars 1 /5 stars 1 /5 stars Good I like this software. On the one hand, it works like it says it will. Set a time, it would be nice if you could pre-select which task to perform. When the time is up, you can just click on it to perform the task. On the other hand, the whole timer thing is a gimmick. At the time I tried it, the timer I used was at 0 minutes and was set to restart the computer. Problem was, it would start the program just fine, but would not restart the computer (the programs abort process in the middle). Download Sleep Timer Clock The best time management and scheduling software for Mac. Used by hundreds of thousands of people worldwide. Sleep Timer Clock is a time manager for Mac. * Schedule any task in any time window from a single window on your Mac desktop. * Set up a variety of different times including 15 minutes, 5 minutes, 1 minute, 10 seconds, one or more hours and more. * Lock and lock computers, turn Macs off and on, and much more. * Tasks include: Shutdown, start, restart, lock Mac, lock other users, standby, hibernate, select and return to user, "Click here to start Safari", lock the screen, Windows sleep, network connection, and more. * Schedule one or many of the same task at one time. * Schedule on any computer, Mac, Windows, or any device, ranging from iPhones, tablets, Android phones, iPads, and all the way down to the most recent touchscreen Macs and Windows 10 PCs. * Tested on Mac OS 10.8 through 10.11.2. * Sleep Timer can also schedule tasks on your Macs using local accounts.
